DEQ independently investigated the former Ohio Refinery site in the mid 1990's under the authority of the U.S. Environmental Protection Agency (EPA), and the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The investigation process and ranking criteria determined the site did not score high enough to be placed on the National Priorities List (NPL) A.K.A. "Superfund".

Currently the Ohio Refinery site is not part of the Wilcox Oil Company Superfund Site. DEQ is exploring options outside of Superfund to address environmental impacts from the former Ohio Refinery site.

DEQ continues to work with residents in the Bristow area to inform them of potential risks associated with refinery contamination, as well as precautions they can take to reduce potential risks.

Todd, do you have info on this site? If not, do you know who would?

Erin,

I would any information/action taken at Ohio Oil Refinery site in Bristow, OK. It is not part of the superfund site but is nearby.

Thank you.
